Hello friends. We celebrate World Oceans Day on June 8th , as we are concerned about nature we collected this information "World Oceans Day 2015 - Theme Activities Facts Date June 8" for you.

World Oceans Day Date

World Oceans Day is June 8th

World Oceans Day Theme

The theme for this year is Healthy oceans, healthy planet.

World Oceans Day History

World Oceans Day, held every June 8th, is the United Nations-recognized day of ocean celebration and action. People all over our blue planet organize celebrations – which can be a huge event in your community, a special announcement, or anything in between – to support action to protect the ocean. This year, the theme is Healthy oceans, healthy planet, and we're making a special effort to stop plastic pollution.

The ocean is the heart of our planet. Like your heart pumping blood to every part of your body, the ocean connects people across the Earth, no matter where we live. The ocean regulates the climate, feeds millions of people every year, produces oxygen, is the home to an incredible array of wildlife, provides us with important medicines, and so much more! In order to ensure the health and safety of our communities and future generations, it's imperative that we take the responsibility to care for the ocean as it cares for us.

This year, the theme is Healthy oceans, healthy planet. Unfortunately, human pressures, including overexploitation, illegal, unreported and unregulated fishing, destructive fishing, as well as unsustainable aquaculture practices, marine pollution, habitat destruction, alien species, climate change and ocean acidification are taking a significant toll on the world's oceans and seas.

The United Nations will celebrate World Oceans Day 2015 and recognize the winners of the Annual World Oceans Day Oceanic Photo Competition at an event on 8 June 2015 at the United Nations Headquarters.

Why do we celebrate World Oceans Day?

World Oceans Day has been unofficially celebrated every 8 June since its original proposal in 1992 by Canada at the Earth Summit in Rio de Janeiro, Brazil. World Oceans Day is an annual observation to honour the world's oceans, celebrate the products the ocean provides such as seafood as well as marine life itself for aquariums, pets, and also a time to appreciate its own intrinsic value. The ocean also provides sea-lanes for international trade. Global pollution and over-consumption of fish have resulted in drastically dwindling population of the majority of species.

The Ocean Project, working in partnership with the World Ocean Network, has been promoting WOD since 2003 with its network of over 1,600 ocean conservation organizations and others throughout the world. Events performed for WOD and awareness includes beach cleanups, educational programs, art contests, film festivals, and sustainable seafood events.

To remind everyone of the major part the Ocean has in everyday life. They are the lungs of our planet, providing most of the oxygen we breathe. To inform the public on the impact of the human actions on the Ocean. To develop a worldwide movement of citizen, towards the Ocean. To mobilize and unite the world's population on a project for the sustainable management of the World Ocean. They are a major source of food and medicines and a critical part of the biosphere. To celebrate together the beauty, the wealth and the promise of the Ocean.

World Oceans Day 2015 - Theme Activities Facts Date June 8

Covering more than 70 percent of the Earth's surface, the ocean remains one of the most uncharted and undiscovered ecosystems on the planet. Home to the majority of life on Earth, the ocean acts as its life support system, controlling everything from our weather and rainfall to the oxygen we breathe. Yet despite the ocean's vital importance, the ocean is changing at a rapid rate due to climate change, pollution, and overfishing, making it one of the most serious environmental issues we face today.
